

**February 1-3, 2018**

Workshops & Field Trips Jan. 30-31

**Los Angeles, CA**

Los Angeles Airport Marriott

### What is the Conservation Conference?

Every 3 years, the California Native Plant Society's Conservation Conference brings together scientists, conservationists, and enthusiasts seeking to learn and find solutions to the issues facing California's natural environment. Over 300 presenters cover a broad spectrum of topics, including rare plants, vegetation science, land management, horticulture, sustainability, and more, and special events provide time for collaboration, networking, and appreciation of our beautifully diverse flora. Whether your career centers around natural resources or you just love native plants, this conference will have something for you.
